

PhET Simulation- Build a Molecule

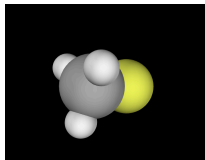

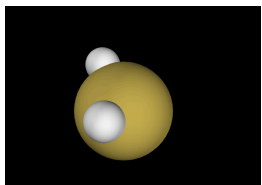

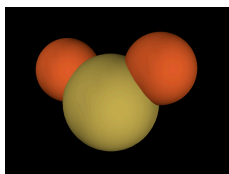

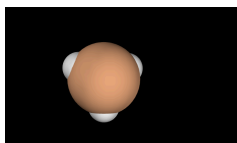

Name: _____ Per: _____ Date: _____

In this simulation, you will build molecules, identify their chemical formulas, and their names.

Part 1

1. Begin by going to
https://phet.colorado.edu/sims/html/build-a-molecule/latest/build-a-molecule_en.html
2. Double click on the Single option.
3. Build the Molecules using the parts in the buckets on the bottom of the screen.
4. Once you have built the molecule, drag it to the correct box on the right to see if you were correct. Then record information in the table below. *Use “command+shift+4” to select an area screen clip, then paste it into the table.*

	Name	Molecular Formula	3D structure
Example	Water	H ₂ O (hit Ctrl + comma to make a subscript; hit same to go back to normal)	
1	Molecular Oxygen	O ₂	
2	Molecular Hydrogen	H ₂	
3	Carbon Dioxide	CO ₂	
4	Molecular Nitrogen	N ₂	
5	Hydrogen Cyanide	HCN	

6	Fluoromethane	CH_3F	
7	Hydrogen Sulfide	H_2S	
8	Sulfur Dioxide	SO_2	
9	Borane	BH_3	
10	Ozone	O_3
